SEADA CONFERENCE

Motorised & Retractable Tablet

Simplifying

Conference Rooms

This motorised retractable tablet is one of the latest innovations from SEADA CONFERENCE.

This system can be used as a standalone unit in class rooms, offices, receptions etc. It can be used not only as a tablet but also a PC. In addition it can operate as a multi units' system with the SEADA paperless conference platform. SEADA conference platform has multiple screens across the table which allows all the participants to have a clear view of the information.

When it is not in use, the tablet can be retracted into the housing beneath the desk. This makes the desk surface tidy as well as putting the tablet in a safe and secure location.

- Ergonomic design
- Optimised viewing angle
- Adjustable viewer angle
- HDCP compliance
- Detachable Tablet
- Secure
- Auto switching between wireless and Ethernet connection
- Compatible with SEADA Multimedia Conference Platform
